SAFE HANDLING OF THE BARIATRIC PATIENT *Workshop*

INTERESTED IN LEARNING WAYS TO PROVIDE SAFE MOBILITY AND HANDLING FOR YOUR BARIATRIC PATIENTS?

This all-new, interactive workshop explores clinical challenges, sensitivity, worker safety and more. Takeaways from the workshop include practical tools necessary to conduct sensitivity training, perform a unit-based readiness assessment and monitor size-associated clinical outcomes.

OBJECTIVES INCLUDE:

1. Identify emerging demographics associated with weight dysregulation
2. Describe cellular changes that occur in the presence of adiposity
3. Locate basic resources for bariatric care and training in your practice setting
4. Create an action plan tailored to your practice setting

Travel reimbursement is available for representatives from THA HIIN hospitals.
